Our heating solutions

Potentially explosive atmosphere

- System-approved, EC/EU type examination certificate (Directive 2014/34/EU)
- Easy access to extensive documentation Zone 1/2 (gas) 21/22 (dust)
- Protection class IP66, IP65
- Temperature classes T6, T5, T4, T3

Series solutions

- Reproducible quality
- Ensuring process capability for series production
- Modern engineering software
- Development know-how
- Prototype construction
- ISO 9001 as a matter of course
- Customer- and UL-certified production High production capacity

Individual heating solutions

- Broad, already existing product portfolio
- Digital design and engineering process
- Experienced, long-standing technical sales
- 3D printing for perfect fit
- High vertical range of manufacture

FLEXIBLE HEATING SOLUTIONS FOR INDUSTRIAL APPLICATIONS

Heated hoses
Analysis lines
Heating jackets
Container heaters
Atex heaters
Silicone heaters

We develop and manufacture your individual heating solution

Winkler has been developing and producing flexible electric heating solutions for over 40 years.
By developing and manufacturing all our products in-house, we are able to develop the right solution for you.

This applies to both large series and individual items. Thanks to our many years of experience, we are also the ideal partner when it comes to sophisticated solutions, such as for explosion protection, the semiconductor industry or automotive suppliers.

High quality and robust design products

Winkler is constantly developing new, individual heating solutions in accordance with national and international standards and certification criteria. We work with a qualit management system in accordance with DIN EN ISO 9001 and are certified for the manufacture of ATEX and UL products.

Our customers can therefore rest assured that materials production and products meet the highest standards.
We have also been audited and certified by demanding customers from the automotive and semiconductor industries.
