HEATING JACKETS FOR SUB-FABS

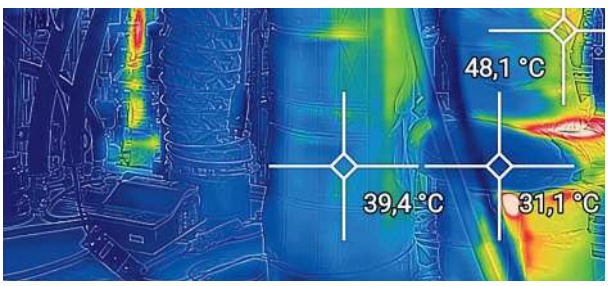

Pipe blocked after 1000 h operation with other heater

Pipe on the same tool after 1000 h with Winkler Hyksy heater

Temperature comparison of Winkler product (left) and other heating jacket (right)

Less maintenance, less downtime

- Hybrid kit system reduces blocking on critical positions by better and more even heat distribution
- Flange heaters prove to increase the maintenance cycle time by factor 5

Half the installation time

- One-piece design ready to install
- Best fit of components reduce the installation time up to 60 % compared to other systems on the market
- This means less time in the critical phase before the start of the tool

Increased energy efficiency

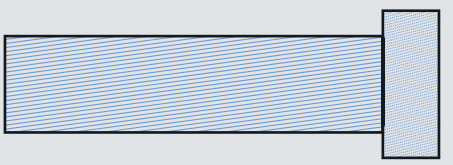

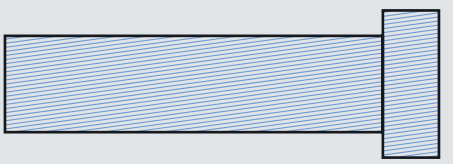

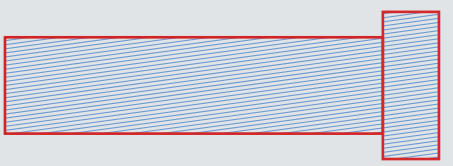

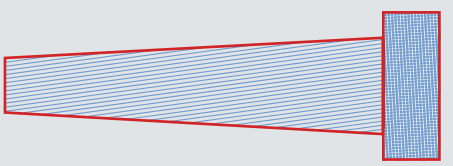

- The Winkler products use a special production technology which improves the heat transfer and increases the energy efficiency by 30 % compared to other products
- Gap covers and wide hook and loop straps reduce the heat dissipation

Compatibility to existing systems

- Winkler heaters can be combined with other heating products
- Winkler heaters can be controlled by existing control systems
- Winkler controllers can be used to control other heaters

HEATING JACKET PRODUCT OVERVIEW

winkler

KIT SYSTEM	PIPE	FLANGE	USE CASE	
ECO KIT SYSTEM	PTFE fabric heating mantle in one piece	Only insulation	Less sensitive processes with low risk of blocking	
CLASSIC KIT SYSTEM	PTFE fabric heating mantle in one piece	Heated with PTFE fabric heating mantle	Standard processes and application with heated flange reduce maintenance cycles by factor 5 High temperature applications up to 200 °C	
HYKSY PRO KIT SYSTEM	Silicone heater with PTFE fabric insulation	Silicone heater with PTFE fabric insulation	30 % less energy consumption Better heat distribution for sensitive areas	
HYKSY SPECIAL Special solution	Customized silicone heater with special fit exactly to the dimensions you need	Customized silicone heater with PTFE fabric insulation	Customized design for better heat distribution for sensitive areas with special geometries	

CE-Conformity
All our products comply with the current regulations

ISO 9001
Quality management for consistently high quality and satisfied customers

UL 499 and CSA C22.2 compliance
Compliant to the quality and safety standards for the American market
